Granite colours	3

INTRODUCTION

We offer rigid, stable surface developed specifically to help decrease vibration during measurement. When used in tandem with a weighing balance, the table allows the balance to perform with marked precision, despite air currents or movements that might cause readings to fluctuate.

Anti-Vibration Balance Table is designed for use in laboratory or metrology room to provide suitable working conditions for devices that are sensitive to vibrations and shocks.

FEATURES

- Excellent acid, alkali and corrosion resistance performance.
- High temperature and impact resistance.
- Can be installed as stand alone or integrated with work benches.
- Easy to clean and maintenance-free.
- Eco-friendly and space-saving.
- Users can work in an ergonomic way at the balance table whether in standing or seated position.
- Can reduce shock when using precision testing equipment and other laboratory balances.
- Rigid construction and high quality materials for easy working.

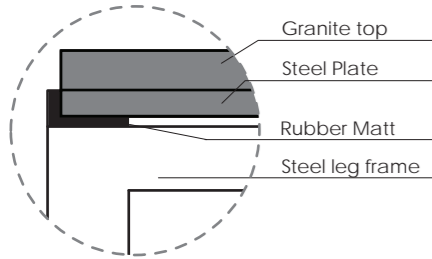

We are a long established manufacturer and have a great deal of experience in the technical furniture industry.

SPECIFICATIONS

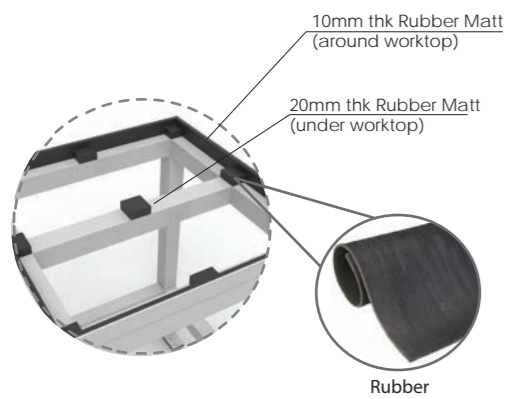

① Granite top

Massive and durable Solid Granite Worktop is mounted on a supporting construction.

② Rubber damper

Installed around and under the worktop as dampers to reduce vibration.

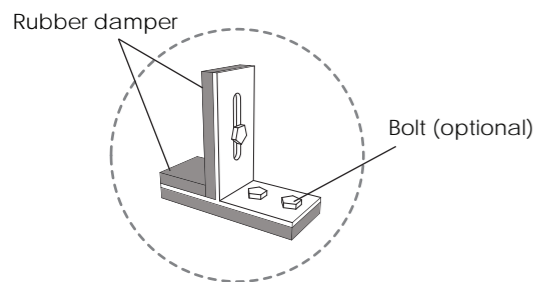

③ Steel frame leg

SHS 50x50 mm with Epoxy Powder Coating Finish

④ Bracket

- Maintains fixed table position to increase stability. Attached with durable industrial glides.

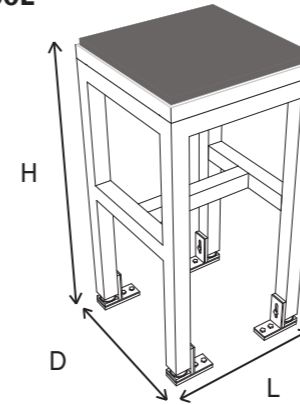

Design details

- Thickness of granite table top is 38 mm.
- Steel frame leg fabricated with **SHS 50x50 mm, epoxy powder coated.
- Steel lateral support beam adds strength and rigidity.
- Bracket comes with horizontal and vertical dampers to eliminate vibration transmission.

**SHS 50x50 mm steel frame leg is for all models except 900L and 1200L. For 900L and 1200L the size of the frame leg is SHS 65x65 mm.
